

Representative CAD editing cases

Input	Ground Truth	NeuralCAD-Edit	Visual Hypotheses	Intent-Aware Editing	DIA-CAD (Ours)
(a) easy_001 Mirror the part according to the plane lying on the not rounded end of the part. Merge the mirrored part together with the existing one so they create one body.					
					
(b) medium_005 Insert screws to both holes to be able to fix tool on the table					
					
(c) hard_010 Add rectangular opening to the lower back of the coffee machine, which might serve as draft location for plug and main ON/OFF switch. Opening should be 20cm x 10cm and 3cm deep rectangle with roundend corners (radius 1cm). Position should be more or less equally distanced from bottom and sides of the device.					
					
(d) hard_005 Design a fixation rod mounted from the top with arm length 200mm to have ability to fix cutting product					
					
(e) hard_001 Multiply amount of cylindrical feature to 4. Imagine this is a system of plant pots, so you need to add stability to that afterwards by adding another legs or ribs on the sides.
